

Drum Suitability Drum Lifters & Drum Trolley

Our drum catch is manufactured from laser cut stainless steel. You can easily adjust the catch to connect securely to drums of different types, sizes and materials. For a breakdown of the drums that are compatible with this catch please see below. If your drums are not mentioned in the below information please get in touch to discuss your requirements.

Tight-head steel

Open-top steel

Plastic MAUSER

Plastic L-Ring

Tapered plastic

Tapered lip steel

Fibreboard / cardboard

Bespoke Drum Catches

Here at STS we can design and incorporate bespoke catch arrangements for unique handling applications. Our drum depalletiser models are designed to handle a wide range of 50 to 220 litre drums. Occasionally a special drum type needs to be handled in industry with an unusual shape, construction or capacity; should this be the case we take pride in being able to offer a safe handling solution. Please get in touch to discuss your requirements.
